

There is no strategic need for the quarry

According to the 'Minerals and Waste Development Framework, Minerals Core Strategy, Preferred Option Consultation, December 2006', there is a massive land bank of crushed rock to last till 2027 which is double the requirement of the NYCC

The proposed site is not in a preferred location

This part of North Yorkshire is not a preferred area for future mineral working nor an area of search for the future, with no justification for it to become one. A scoping opinion released by NYCC in Feb 06 stated that the quarry was not a 'Preferred Area' – "Mineral extraction & Resource Protection North Yorkshire Minerals Local Plan – states Policy 3.2.8 – Having identified Preferred Areas & Areas of Search for Future Aggregate mineral working it follows that new aggregate mineral workings outside these areas would be contrary to policy.....need to be justified by other material considerations as required by section 54A of the 1990 Act"

Update

In the last few months there have been further planning permissions approved for

- The Black Bull at Moulton for the erection of a Function/Conference Centre with accommodation and additional car parking. This approved Development will affect the need for the facilities being offered at Middle Lodge Development. It will also increase the amount of traffic in our villages.
- Scotch Corner Business Park. Application approved. Could/will affect traffic at the West End of Middleton Tyas.

Both these Developments will provide jobs in the area.

HOW YOU CAN HELP...

YOU CAN STOP THIS NEW QUARRY IN OUR LOVELY VILLAGE!
